

Natural Volume Restoration Without Tissue Harvesting

Sterile, human-derived adipose matrix for aesthetic enhancement—no fat grafting required.

We understand the challenges of restoring volume and contour in aesthetic procedures. NovioFill offers a cutting-edge solution by providing an off-the-shelf adipose matrix that addresses small soft tissue defects without the need for patient fat harvesting. This innovative approach reduces surgical time, minimizes patient discomfort, and delivers natural-looking results.

NovioFill is a human-derived adipose matrix designed for the treatment of small soft tissue defects. It is engineered to provide volume restoration in areas such as:

- Cellulite dimples
- Liposuction irregularities
- Volume loss in temples, cheeks, and hands

The matrix undergoes minimal processing to ensure sterility while preserving essential growth factors that support natural fat regeneration. This approach allows the patient's own cells to repopulate the treated area, leading to more natural and lasting results.

Key Features At a Glance

- Ready-to-use adipose matrix: Sterile and shelf-stable, eliminating the need for fat harvesting.
- Preserved growth factors: Minimal processing retains key elements for adipogenesis and angiogenesis.
- Convenient in-office procedure: Quick rehydration and easy application during a standard office visit.
- Long shelf life: Store at room temperature for up to one year.
- Immediate and progressive results: Noticeable improvement post-treatment with continued enhancement over time.

Why Choose NovioFill?

- No donor site required: Avoids the need for liposuction or fat harvesting—reducing procedure time and patient discomfort.
- Preserved regenerative potential: Retains essential growth factors to support natural tissue integration and long-term results.
- Versatile application: Suitable for a variety of small soft tissue defects and aesthetic enhancements.
- Predictable outcomes: Consistent quality and volume make results reliable and reproducible.
- Easy handling: Off-the-shelf, ready-to-use matrix that simplifies in-office procedures.

Handling & Surgical Tips

- Rehydration: Follow the provided instructions for optimal rehydration of the matrix.
- Injection technique: Utilize appropriate cannulas or syringes to ensure even distribution.
- Post-procedure care: Advise patients on aftercare to maximize results and minimize complications.

Clinical Applications

- Cellulite dimples: Smooth and contour affected areas for improved skin appearance.
- Liposuction defects: Correct irregularities and enhance skin texture post-procedure.
- Volume loss: Restore youthful fullness to areas such as the temples, cheeks, and hands.

Ordering Information

To place an order, our team will assist you with product selection, regulatory compliance and timely delivery. Focus on patient care — we'll handle the logistics.

Code	Description	Volume
BE9015GL	NovioFill, Adipose	1.5 CC
BE9030GL	NovioFill, Adipose	3.0 CC
